K-12 Education & Public Outreach
Broader Impact Opportunities and Resources for-Madison faculty/staff, graduate students, and postdocs

Participate in Precollege Science Enrichment Programs for Students:
Partner with community members and local organizations to provide science enrichment for students and families in K-12 schools or as part of informal science activities for youth (science fairs, family science nights, afterschool clubs and more) through ARMS (Adult Role Models in Science). Contact: Dolly Ledin

Host minority or underserved high school students for a summer research experience as a mentor in the Summer Science Institute of IBE or the PEOPLE program. Contact: Robert Bohanan

Lead a one-week or three-week summer science inquiry course for minority/underserved high school students in the Pre-college Enrichment Opportunity Program for Learning Excellence (PEOPLE). Contact: Robert Bohanan

Participate in Professional Development Programs for K-12 Teachers:
Team up with other educators to create K-12 teacher professional development courses or materials based on your research. Contact: Kevin Niemi

Become involved with Wisconsin Leads, an IBE/School of Education and its Education Outreach and Partnership office to deliver professional learning opportunities for classroom science teachers. (eop.education.wisc.edu/eop/professional-learning/partnerships). Contact: Kevin Niemi

Share your research and your enthusiasm for science through Outreach and Community Engagement:
Participate in a variety of outreach programs coordinated through members of the Science Alliance. Science Alliance has a weekly email listserv on upcoming science outreach events and activities, meets weekly on most Mondays at 10 am in 1360 Genetics/Biotechnology Center, and organizes campus wide events such as the annual Science Expeditions. Contact: Kevin Niemi
